How Watch Cases are Made.

Most persons have an ambition to carry a gold watch case, and yet few people know low a watch case is made, or the vast disforence in the quality of them. In a South GOLD WATCH CASE, aside from the necessary thickness for engraving and polishing a large proportion of the metal is needed only to stiffen and hold the engrave! por tions in place, and supply strength, . i.. ble, because gold is a soft metal and can furnish the stiffness, stren, thand elstiness, necessary to make the case permatent strong and close-fitting. "I do not profess to be infallible, but I do claim that no sincere and honest workingman can examine my record and find from it anything which tends to show a lack of sympathy with and care for the true interests of those who labor. I am somothines afraid that at least a few of those who pose as friends of the workingmen do not keep themselves fully informed as to what is done for them by may of legislation. As an illustration I see it stated in the papers as coming from one who professes to be especially the friend of the workingmen, and claiming to be a leader among them, that I votoed a bill preventing contract labor by children in the reformatories and institutions of the State. In point of fact, this bill was promptly signed by me, and this bill was promptly signed by me, and no other measure—touching this—quesion has been presented to me.
